

# Blister lidding

## **Push-through, peel-push, tear-open and peelable lidding**

Amcor offers a wide range of blister lidding solutions that can meet the pharmaceutical market's demand for high quality products. Our blister lidding materials are designed to meet your needs for product protection, opening convenience, packing line efficiency and consistent high quality printing.

## Features

- Push-through, peelable, peel-push, tear-open and child resistant options
  - Tailored solutions for new therapies, new processes and special applications
  - Push-through foil in gauges 15-30 µm, hard or soft tempered
  - Peelable opening in gauges 20 and 25 µm soft, laminated with PET or paper/PET
  - Heat sealable (push-through and peelable foil) to PVC, PVdC, PP, PET and PE; sealable directly (push-through foil) to Polybar® - Aclar®
- 

## Key benefits

- Broad product range serving all your application needs and optimizing speed-to-market
  - Efficiency on blister lines guaranteed with proven processability
  - Optimal barrier properties provided by aluminum foil
  - High performance ensured by optimized sealing to Amcor's bottom webs: Formpack®, Polybar® and other thermoformed films
- 

## Applications

- Pharmaceuticals for human and animal health
  - Nutraceuticals
  - Special drug delivery systems
  - Biotech and diagnostics testing
- 

## Options

- Rotogravure and flexographic print competency
  - Colored lacquer on both sides
  - Optional overlacquer for improved heat seal resistance
  - Two-sided print for calendar or patient compliance packs for marketing physician samples
  - In-house graphic design service
  - N'CRYPT® integrated solutions for anti-counterfeiting
- 

## Added value

- Regulatory and pharma GMP compliant
- Global network to offer continuity of supply
- Global R&D innovation centers
- Technical assistance
