

Formpack® Tropical Blister

Setting the Standard - Impermeable overlay barrier

Demonstrating the versatility of the market leading coldform brand, Formpack® Tropical Blister is the ideal enhancement to conventional thermoformed blisters. It adds the protection of an impermeable barrier to moisture, light, oxygen and other gases.

Features

- Impermeable barrier: moisture, light, oxygen and other gases
- Maximum fracture-free forming capabilities
- Long-term delamination resistance
- Versatility: selection of stiffness, additional print surface and colorized
- Perforation flexibility
- Peelable “transparent” aluminum blister

Key benefits

- Security: original coldform brand, more than 30 years of proven performance
- Protective barrier enhancement of thermoformed blisters extends product shelf life
- Unsurpassed quality: consistent performance maximizes production reliability
- Temperature resistance
- Increased stiffness

Applications

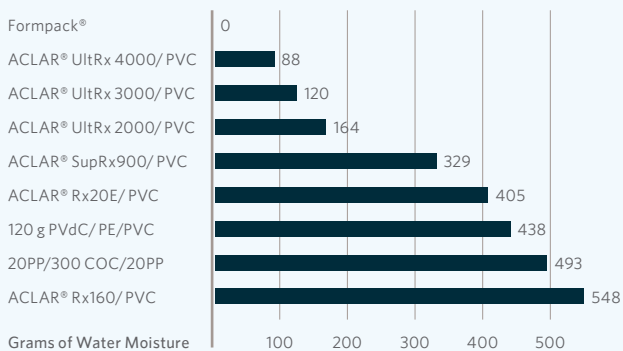

- Customizable to satisfy specific application needs
- Tablets, capsules, inhaler medication

Added value

- Fracture-free guarantee when tooling is designed by Forsis® simulation and PhiCheck analysis services
- N'CRYPT® Pharma Security Solutions for anti-counterfeiting protection
- Regulatory and pharmaceutical GMP compliance
- Technical assistance
- Global network to offer continuity of supply
- Global R&D innovation centers

Cavity Moisture Barrier

Potential water vapor leakage during 36 months shelf-life
