

# Amcor TearStick®

## Laminates for convenient single-use packaging solutions

Stick packs are a fast growing solution for single-use pharmaceutical applications, providing lightweight, secure and hygienic packaging, perfect for travelling and easy disposal. Amcor TearStick® can enhance your brand awareness by offering product differentiation and creating new marketing opportunities.

## Features

- Wide range of material combinations including PET, aluminum, films, etc.
- Unique platform of technologies: adhesive, extrusion lamination, (co)extrusion coating, etc.
- Rotogravure/flexographic printing from small to large quantities

## Key benefits

- Good compatibility between the product and package
- Excellent seal integrity for highly sensitive or aggressive drugs
- Optimal output on conventional or custom packaging equipment
- Easy to squeeze, convenient and hygienic dispensing
- Minimal waste of product and packaging

## Applications

- Powders and granules
- Liquids
- Creams and gels

## Options

### Optimum Easy-Tear Opening Solutions

- Technologies such as laser scoring or Amcor Opening Features facilitate the easy tear initiation through multi-layer laminates, including cross seals
- The tear notch can be eliminated and replaced by a tear indicator located anywhere on the package
- Ease of opening can be controlled to customer requirements

### Amcor SafeStick™: child resistant, easy open stick pack

- Instructions must be followed in order to open pack at tear initiation point
- The pack tears easily, but only at area designated by graphics and text
- Printed indicator and text may be used as a stand alone tear-open feature, or in combination with a “fold first” or “squeeze first” operation, depending on child resistance and end-use requirements

## Added value

- Regulatory and pharma GMP compliant
- Global network to offer continuity of supply
- Global R&D innovation centers
- Technical assistance
