

# Pharmaceutical strip pack laminates

## Individual high barrier protection for moisture sensitive drugs

Amcor's strip pack laminates offer optimal individual protection for your most sensitive pharmaceutical products. Offering enhanced portability for consumers, strip packs are a convenient packaging solution that allows patients to transport the exact quantity they need, without compromising safety, product recognition or convenience.

## Features

- Material built on solventless technologies: extrusion lamination and (co)extrusion coating
  - Exceptional barrier properties against oxygen, moisture, light
  - Sealant layer adapted to your needs, whether PE, Surlyn or coextrusion
  - Rotogravure/flexographic printing from small to large quantities
- 

## Key benefits

- Product/package compatibility and low interaction profile
  - Perfect seal integrity
  - Good tearability for opening convenience
  - Printing on each individual pack allows for product recognition and regulatory information
  - Optimal output on conventional or custom packaging equipment
- 

## Applications

- Tablets
  - Pills and capsules
  - Effervescent tablets and powders
  - Transdermal patches
- 

## Options

- Dessiflex™: integrated desiccant solution for advanced moisture protection
  - Child resistant options adapted to local/international regulations
- 

## Added value

- Regulatory and pharma GMP compliant
- Global network to offer continuity of supply
- Global R&D innovation centers
- Technical assistance
