

# Alufix<sup>®</sup> Dry

## The safe and convenient can closure for dry food

Alufix<sup>®</sup> makes opening a can child's play! Amcor's peelable lid for sealing onto tinfoil rings provides the can with a safe and convenient closure solution. With its aluminum layer, Alufix<sup>®</sup> offers the best possible protection for dry products.

## Features

- Outstanding barrier properties against gases, water vapor and light
- No sharp edges
- Low peel strength
- Suitable for flat and finger hole tabs
- No metal splinters
- BPA and melamine free
- Puncture resistant

## Key benefits

- Easy opening of cans
- No risk of injury
- Senior and child friendly
- Tamper evident
- Superior product protection
- Easy and complete access to the fill good
- Sealable on a wide range of ring materials
- Excellent machinability on standard membrane sealing machines
- Alufix® ends suitable for standard seamers

## Options

- Alufix® Dry PRO: membrane with a PP coextrusion coating for sealing against plain and lacquered tinfoil rings
- High resolution UV flexo printing
- Special grade for fatty fill goods available

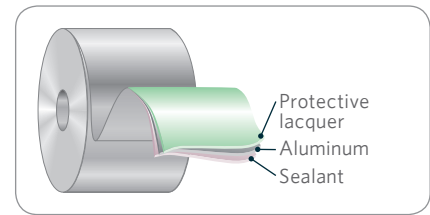

## Applications

All dry products without heat processing after filling, e.g.:

- Milk powder
- Infant formula
- Instant products (drinks, gravy)
- Biscuits
- Coffee
- Chocolate powder
- Snacks
- Chemical powder

## Added value

- Integrated lacquer development, migration lab
- Pilot factory (sealing, peel forces, burst pressure, autoclaving tests)
- Field support
- Integrated aluminum supply chain, back-up lines/plants
- Partnership with machine manufacturers, steel suppliers and can makers
