

Alufix[®] Retort

The safe and convenient can closure for retort food

Alufix[®] makes opening a can child's play! Amcor's peelable lid for sealing onto tinplate rings provides the can with a safe and convenient closure solution. With its aluminum layer, it offers the best protection for retort fill goods.

Features

- Outstanding barrier properties against gases, water vapor and light
- No sharp edges
- Low peel strength
- Superior corrosion protection
- No metal splinters
- Excellent interlayer bond strength
- Good puncture resistance
- Suitable for continuous autoclaving

Key benefits

- Easy opening of cans
- No risk of injury
- Senior and child friendly
- Superior product protection
- Easy and complete access to the fill good
- Reduced packaging weight
- Tamper evident
- Suitable for fill goods with a low pH
- Excellent machinability on standard membrane sealing machines
- Alufix® ends suitable for standard seamers

Options

- Retort resistant high resolution UV flexo printing
- Enhanced puncture and tear resistance
- Additional corrosion lacquer for fill goods with a low pH
- Embossing, die-cutting

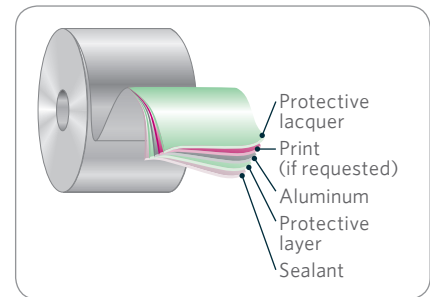

Applications

All products with heat processing after filling, e.g.:

- Patés, meat
- Vegetables, salads
- Baby food
